Left  Right  Upper  Lower  Bilateral  R/O \_\_\_\_\_

Lumbar Epidural Steroid Injection  Nerve Block

Other \_\_\_\_\_

Referring Physician \_\_\_\_\_

Contact Person/Phone \_\_\_\_\_

**→ PLEASE SEND ALL CHART NOTES, IMAGING STUDIES AND DEMOGRAPHICS WITH THE REFERRAL**

\***Consultation**-A request and reason for a consultation from an appropriate source and the need for consultation (i.e. the reason for a consultation service) shall be documented by the consultant in the patient's medical record and include the requesting physician or qualified NPP's (Q-NPP) plan of care in the patient's record.

\*\***Assuming of Care**-Assuming of care occurs when a physician or Q-NPP requests, and another physician or Q-NPP agrees, to take over the responsibility of managing the patient's complete care for the condition and does not expect to continue treating or caring for that condition. When the assuming of care is arranged, the requesting physician or Q-NPP is not asking for an opinion or advise to personally treat this patient and is not expecting to continue treating the patient for the condition. The receiving physician or Q-NPP, upon agreeing to assume care, shall document this transfer of the patient's care, to his/her service, in the patient's medical record or plan of care.
